

STUBBLE CRUNCHER

MANDAKO

SOLID DESIGN...PROVEN PERFORMANCE

Mandako's Stubble Cruncher

The Stubble Cruncher is an easy and effective choice in a variety of conditions. Whether it's chopping up corn stalks, breaking down canola stubble, or gently incorporating cover crop, the Stubble Cruncher gets the job done.

Benefits

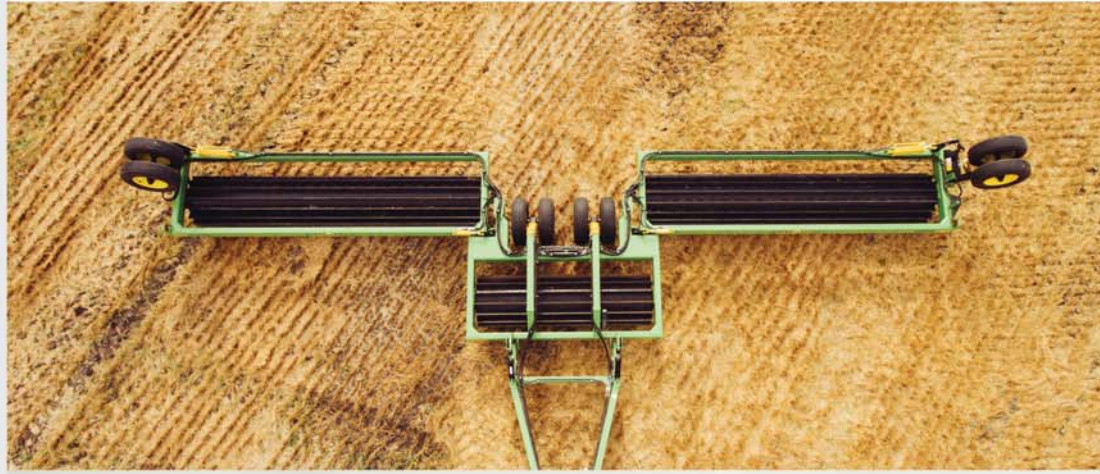

Leftover residue from harvest can take a long time to decompose. This causes issues when planting or seeding in the spring. Using the Stubble Cruncher helps speed up the decomposition process by "crunching" the residue in to the ground.

Sizes:

- 20' *Inline Style*
- 30'
- 34'
- 40'

- Optional Accessories*
- Mechanical Acre Counter
 - Clevis Hitch Insert
 - Mechanical Hitch
 - Hydraulic Floating Hitch

Take a look at our other products

Grain Wagon

The Mandako GRAIN WAGON features auto-steer front axle, hydraulic rear axle suspension, 1200 bushel capacity and 20" unload auger (approx. 400 bushels/min).

5-Plex Land Roller

The Mandako 5-plex LANDROLLER features working widths up to 85' with 5/8" drum.

3-Plex Land Roller

Use the Mandako LANDROLLER to increase seed germination, increase crop yield, promote faster decomposition of residue and reduce repairs on expensive equipment.

Twister

The Mandako TWISTER is a true Vertical Tillage machine. Use it for the lightest pre-tillage applications in the spring and for heavy residue management in the fall... and everything in between.
